

Combi rotary printing presses. Beyond the limits.

We present to you the Combi concept for the new rotary printing presses with variable format. They are developed to combine, in-line, the advantages of flexo and offset printing. The narrow web Combi machines permit all kinds of "custom made" compositions, combining flexo and offset printing units with other printing processes and any "in-line" converting and finishing process.

Beyond the technical limits, Combi is the logical answer to the needs of your customers for their labels, cartons, mailings, commercial printing, flexible packaging or any another complex printing process.

Rotary presses
with variable format

Rotatek is a Spanish company leader in the production of rotary printing machines and complementary equipment. Since 1972 our priority has been the development and the technological investigation to be able to design and to manufacture machines capable to be adapted perfectly to the constant changes of the market.

Because of this, our printing machines are practical, flexible, reliable, efficient and offer an optimum price-quality relation. The close collaboration with our customers, together with our technological knowledge, permit us to find in each case the solution that is better suited to your real needs.

More than 1500 units installed in 70 countries is a good proof of our capacity to give full satisfaction to the most complex needs of the printer.

ROTATEK Combi, Rotary printing presses with variable format

The COMBI machine of Rotatek, suitable for printing labels, flexible packaging, commercial printing, etc., have a modular concept that permits a totally variable composition, not only of the flexo and offset printing units, but also a wide range of different printing, processing and in-line finishing processes. As with all Rotatek machines, the COMBI follows the high basic standards of our rotary presses: flexibility, easy access, quick changes of format and an excellent performance in printing and finishing.

Options:

- Delam-Relamination Unit for printing on adhesive
- Silkscreen Printing Unit
- Cold Stamping Units
- Hot Stamping Units
- Laminating Unit
- Perforating Unit
- Rotary Die Cutting Unit with Matrix Rewinder
- Chill Rollers for film printing
- Hot Air Dryers
- UV Dryers
- Automatic Register System
- Scanner for a Second Pass Printing
- Turn Bars
- Zig-Zag Fan Folder
- Sheeting Unit
- Stacker
- Modem for on-line diagnostics
- Etc.
