

COUPON BOOK FINISHING SYSTEMS

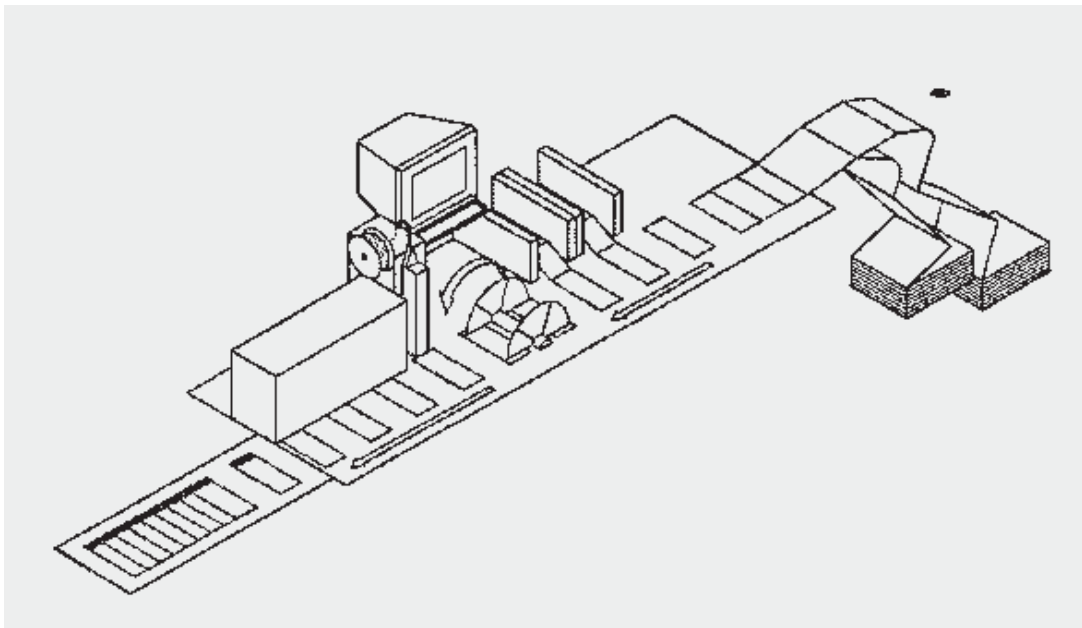

SIBAFLEX P

TWO CONTINUOUS WEBS PRINTED 1-UP

System Description

The Sibaflex P system is designed to produce coupon booklets with number of documents variable at random, from one (1) or two (2) continuous webs, personalized and printed 1-up.

Up to 4 cover/enclosure feeders complete the collation of each booklet with precut, non personalized documents. Stitching and spine taping are an integral part of the binding section.

System Configuration

- Dual web cutter
- Buffering conveyor
